STEP INTO THE STORY

Pollinator Habitat

CONNER PRAIRIE

STEP INTO THE STORY

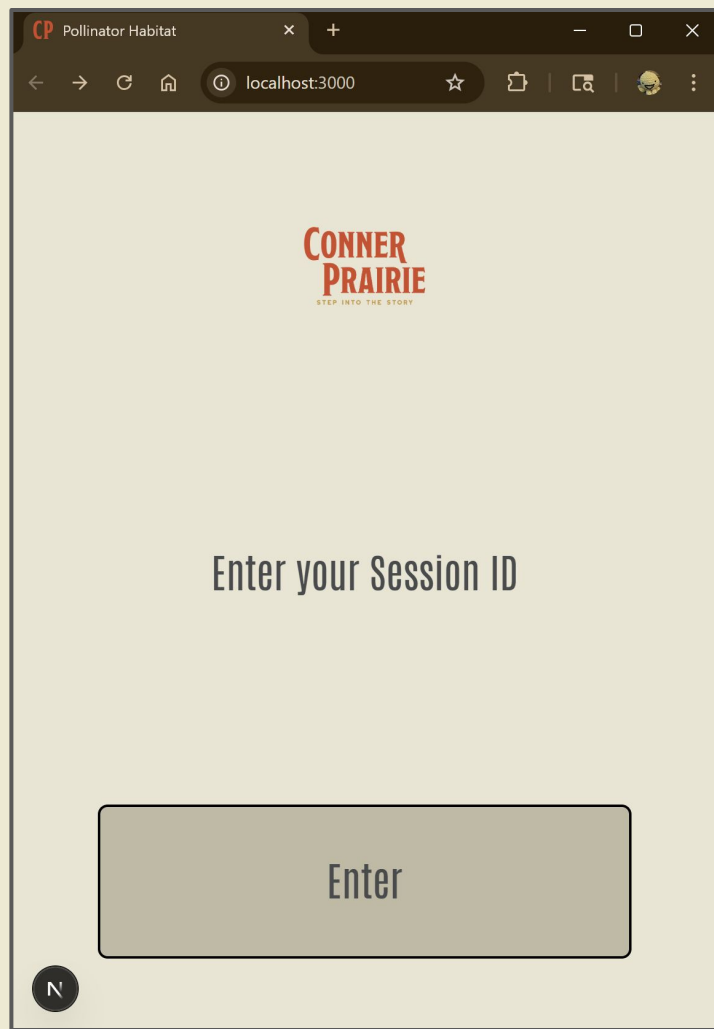

Digitizing a
paper-based
educational activity to
teach Conner Prairie
guests about pollinator
facts in a fun,
interactive way

Iteration Features

Join Session Page

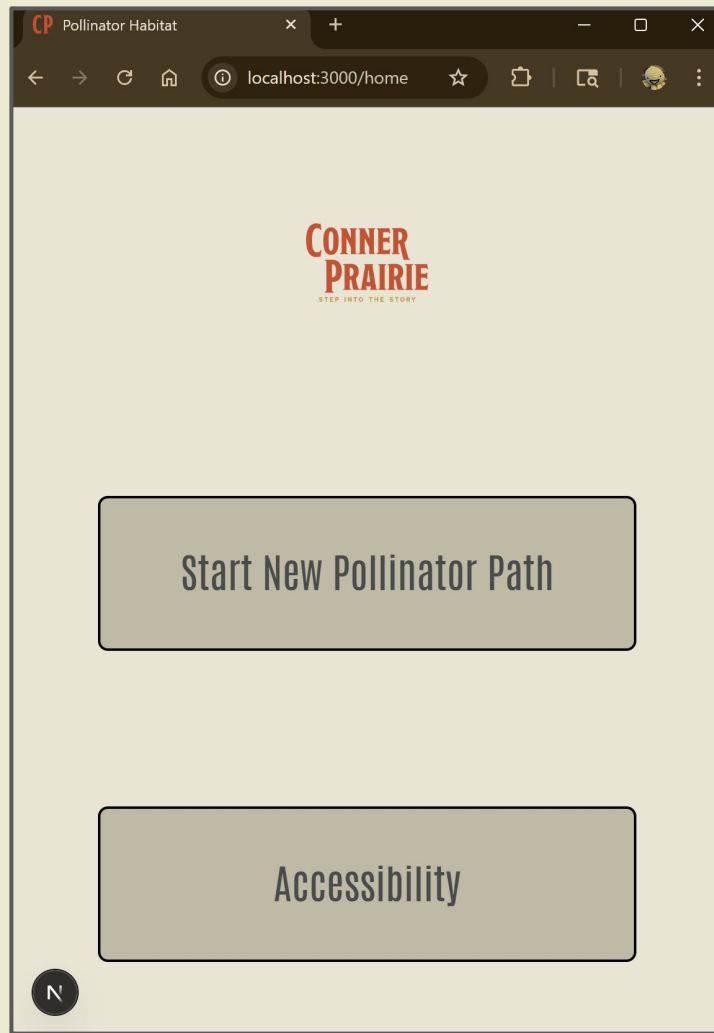

This page is the first page the player will see, and acts as a placeholder to join their game session. After the player enters their session ID (implemented next iteration) and clicks the "Enter" button, they are able to play the game.

Iteration Features

Home Page

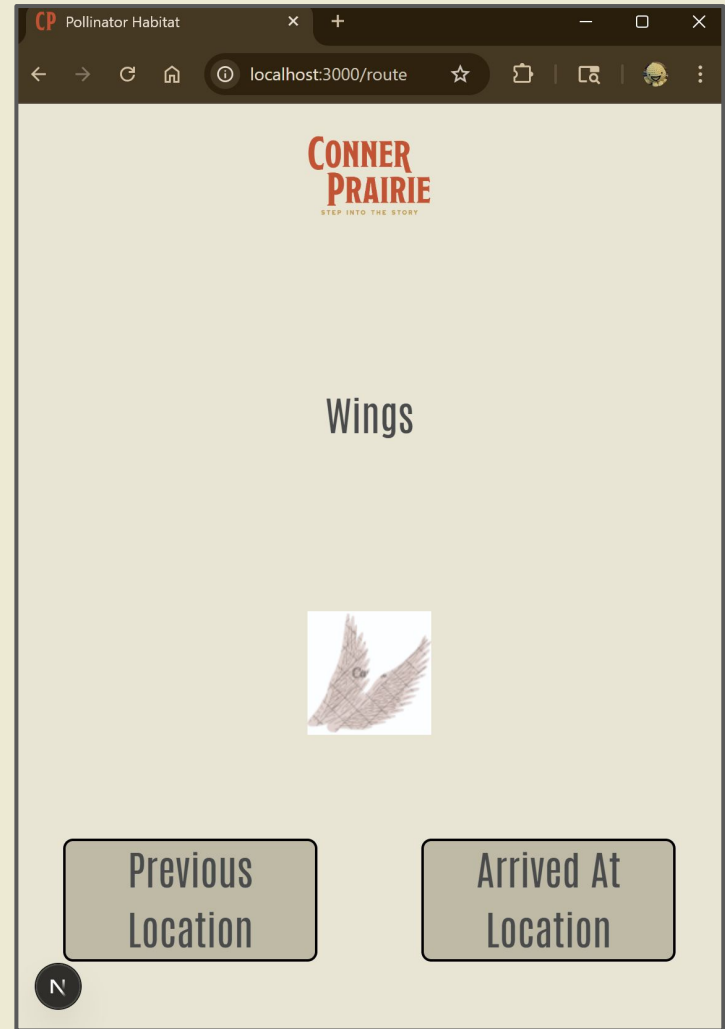

This page allows the player to start the game loop by clicking the "Start New Pollinator Path" button, or change their accessibility settings by clicking the "Accessibility" button.

Iteration Features

Route Images

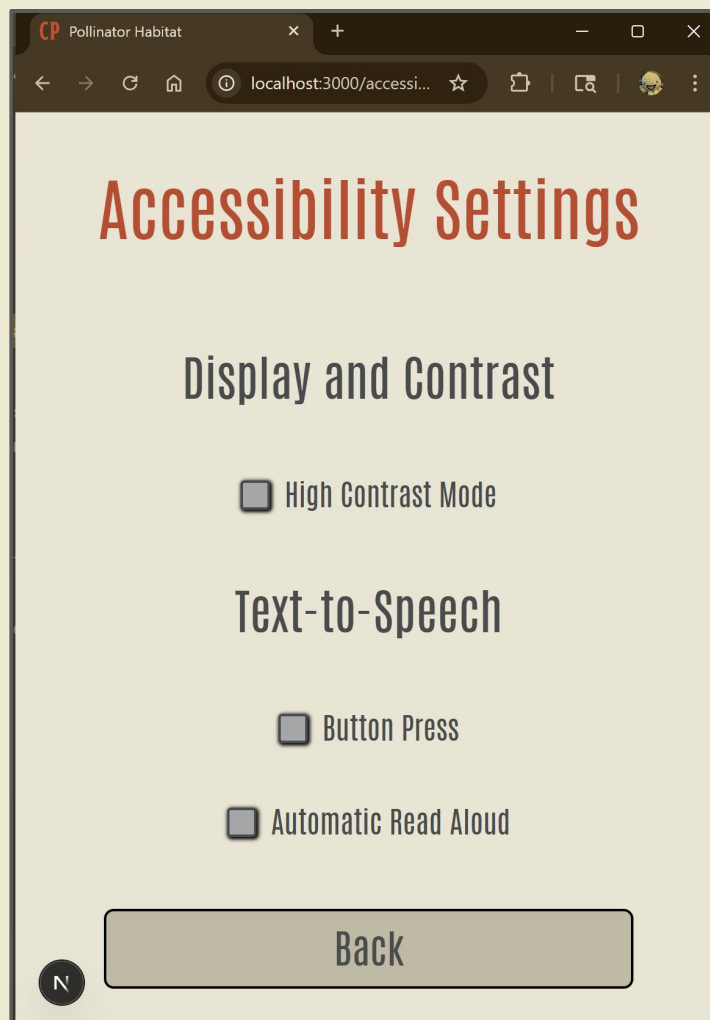

The player can now see an accurate image for their current station while in the game. These images are pending final client approval, after which they will be cleaned and finalized (hence some watermarks and non-transparency).

Iteration Features

Accessibility Page

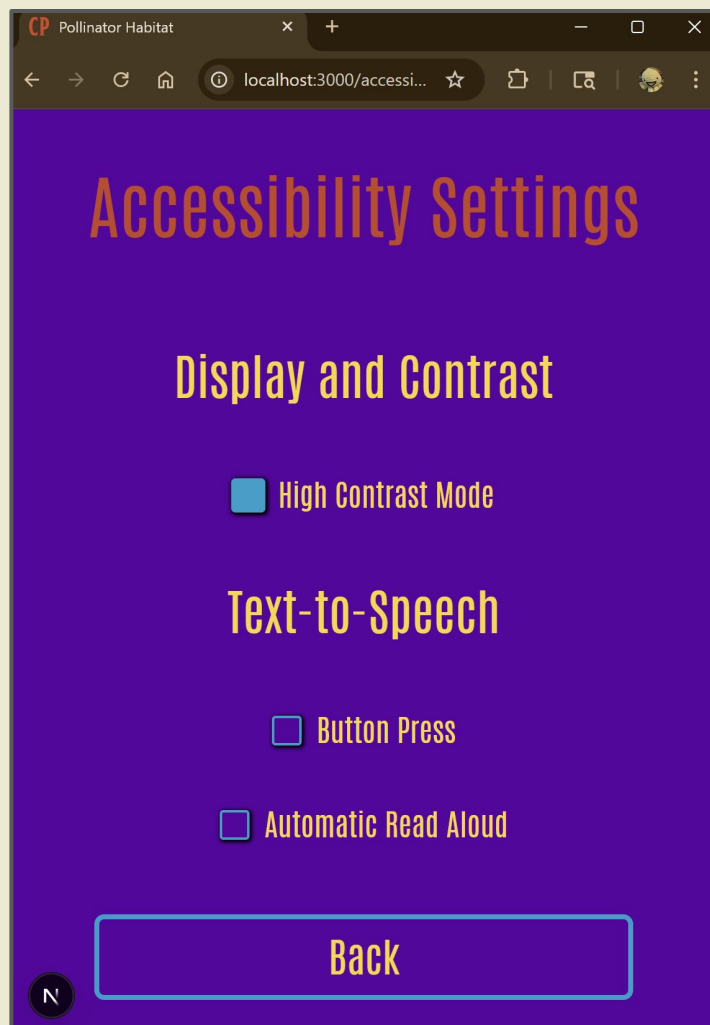

This page allows the player to select various accessibility setting options. Text to speech buttons are currently placeholders, and there will be more options added next semester. Selected settings are saved and used on all pages until the player returns to the Accessibility menu to change them.

Iteration Features

Accessibility Mode: High Contrast

This is an accessibility setting that changes the colors of everything on the screen to follow high contrast standards.

Third Iteration Features

High Priority

- Finish accessibility settings
 - Automatic and button-activated text to speech
 - Font size and font customization
 - Publicly hosted game and accessible using a permanent QR code
 - Viewable list of discovered pollinators and a count of remaining pollinators, like a pokedex
-

Medium Priority

- Private website hosting for staff website on Conner Prairie's staff wifi
 - Session ID
 - Automatically and uniquely generated each day
 - Viewable by Conner Prairie staff members on the staff website
 - Joinable by players
-

Low Priority

- Staff members can enable and disable paths for the current session
- Staff members can login to the staff website using their unique username and password
- Disabled paths in a session cannot be randomly picked for players in that session

Client Feedback

As of this Monday, 12 / 01

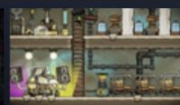

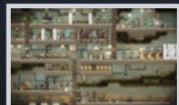

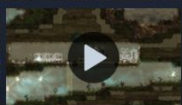

- High-contrast color palette confirmed
- Text to speech autoplay should be short, 10 - 15 seconds
- Conner Prairie logo should be removed or smaller during Route playthrough
- Facts/Route progress should be more intuitive
- Facts should more obviously differ from route
- Collecting pollinator graphic to show route completions for each user
- Automated session start/end status based on dates
- Lower the priority of pop up sessions, prioritize permanent exhibit
- Session IDs should indicate which activity deployment (prefix for session IDs)

Team Retrospection

- Importance of testing faster and more efficiently
 - Write a component, test the component, repeat
- Team communication and deadlines for tasks overall worked well
- Prioritize smaller tasks in addition to the overall tasks
- Focus on improving modularity of code to increase test coverage and effectiveness
- Some may work over winter break, others are taking the break to relax and come back energized and focused next semester

Oxygen Not Included

Community Hub

Oxygen Not Included is a space-colony simulation game. Deep inside an alien space rock your industrious crew will need to master science, overcome strange new lifeforms, and harness incredible space tech to survive, and possibly, thrive.
