Example Statistics

Conclusion

- Design UI & UX from the target audience's perspective (children)
- Prototype fast and implement feedback from real users
- Intentional design plans to avoid future pitfalls
- Simplicity is better in public software
- Clarify design questions with non-technical individuals
- Gameplay design for ease-of-use and fast replayability
- Purposeful functionality limits to protect the user from themselves

Acknowledgements

Faculty Mentor

Huseyin Ergin, Ph.D.

Associate Professor of Computer Science (Ball State University)

Client

Ronda Hamm, Ph.D.

Director of Food, Farm, and Energy Experience (Conner Prairie)
